WORK EXPERIENCE

Frontend Web Developer

Jan 2026 — Present

Aerotalon - Contract, Remote

Victoria, Australia

- Developed and maintained an aviation information system using React and TypeScript
- Redesigned the role-based permission UI from plain roles to a more granular RBAC model
- Improved DX by fixing issues, migrating to modern stack. Cutting build time by ~80% resulting in faster deployments
- Developed an MRO module to help customers manage their MRO-related operations more efficiently
- Implemented an offline mode for the app using service workers and IndexedDB

Stack: TypeScript, React, React Router, Tailwind

Fullstack Web Developer

Apr 2024 — Dec 2025

PT. Global Scholarship Services Indonesia - Fulltime, Remote

Bogor, Indonesia

- Built CI/CD pipeline (GitHub Actions, Docker, VPS) that cut deployment time from ~10min to ~2min, with zero-downtime rollouts
- Drove Lighthouse score from <70 to >95 through code splitting, image optimization, and server-side caching, directly improving SEO and conversion
- Stabilized back-office by fixing broken data sync between services and automating repetitive workflows, eliminating hours of manual reconciliation per week
- Maintained 99% uptime during peak traffic by profiling and rewriting slow MySQL queries and tuning Nginx/PHP-FPM
- Rewrote legacy finance module from procedural PHP to a typed service layer with automated reconciliation, eliminating rounding errors and audit discrepancies
- Shipped real-time quiz platform (Laravel Ververb, WebSockets) replacing paper-based pre/post-tests, cutting grading turnaround from days to instant

Stack: TypeScript, NodeJS, NextJS, Laravel, MySQL, Docker

Fullstack Web Developer

Jan 2023 — Apr 2023

PT. Healstation Indonesia - Freelance

Indonesia

- Built CMS from scratch (Next.js, tRPC) for a Korean rental platform spanning cars, camp cars, and camping sites
- Designed normalized MySQL schema that handled 10K+ listings with sub-100ms queries via composite indexes and query optimization
- Containerized all services with Docker Compose, turning multi-hour dev environment setup into a single command

Stack: TypeScript, NextJS, tRPC, MySQL, MinIO, Docker

PROJECTS

Foldcn (foldcn.elianiva.com)

Jun 2026 — Present

- Built Foldcn, a shadcn-style registry of copy-paste components for Foldkit, installable with the shadcn CLI
- Markdown copy of every page plus an /llms.txt index, so LLMs can read the docs
- pnpm and Turbo monorepo deployed to Cloudflare with Alchemy, typechecked with TypeScript 7

Stack: Foldkit, Effect, Tailwind, TypeScript

RooCode (github.com/RooCodeInc/Roo-Code)

May 2025 — Dec 2025

- Actively contributed to RooCode's development, an open source AI agent that helps you write code
- Improved the context mention UI for better UX, worked on the initial UI for the Marketplace similar to VSCode's marketplace
- Worked on 30+ PRs, mostly UI-related improvements, bug fixes, and helped people in the community

Stack: TypeScript, React, VSCode Extension API

EDUCATION

State Polytechnic of Malang

Malang

Bachelor's of Applied Science, Informatics Engineering

Aug 2022 — Aug 2026

- Cumulative GPA: 3.86/4.0
