Work Experience

Frontend Web Developer Jan 2026 — Present
Aerotalon - Contract, Remote *Australia*
- Maintain an aviation information system on Cloudflare Workers for 200 operators, migrated from Remix to React Router 7
- Replaced 45 legacy scopes with a 73-scope permission model across 30 modules at view, manage, and admin levels
- Built durable offline CRUD for flights with a service-worker app shell, an ordered outbox, and an IndexedDB query cache
- Added a critical-path bundle budget that fails the build, after @react-pdf (1.4 MB) leaked onto every route
- Built the MRO module for work orders, parts and stock, tools, defects, airworthiness, and timesheets

Stack: TypeScript, React, React Router, Tailwind

Fullstack Web Developer Apr 2024 — Dec 2025
PT. Global Scholarship Services Indonesia - Full-time, Remote *Bogor, Indonesia*
- Built CI/CD with GitHub Actions, Docker, and VPS, cutting deploy time from ~10 min to ~2 min with zero downtime
- Fixed enrollment-to-payment sync and automated 8 workflows, cutting manual reconciliation from ~6 hrs/week to under 30 min
- Rewrote the finance module from procedural PHP to a typed service layer, reconciling ~12K transactions a month
- Shipped a real-time quiz platform with Laravel Reverb and WebSockets for 2K+ students, cutting grading from 3 days to instant

Stack: TypeScript, Node.js, Next.js, Laravel, MySQL, Docker

Fullstack Web Developer Jan 2023 — Apr 2023
PT. Healstation Indonesia - Freelance *Indonesia*
- Built a CMS in Next.js and tRPC for a Korean rental platform, serving 20+ admins managing 500+ bookings per week
- Designed a MySQL schema for 10K+ listings, keeping search and filter p95 under 100 ms with composite indexes

Stack: TypeScript, Next.js, tRPC, MySQL, MinIO, Docker

Frontend Web Developer Jun 2022 — Aug 2022
Enam Dua Teknologi - Freelance *Indonesia*
- Built Jira-like task management system for J99 Corp. Holding, replacing email and WhatsApp-based task coordination across their corporate group
- Adopted Render-as-you-fetch with Suspense to unblock the initial render, cutting perceived load time by ~50% for dashboards with 100+ tasks
- Structured UI with Atomic Design (atoms, molecules, organisms), enabling 3 other devs to compose new screens from existing primitives instead of duplicating code
- Added real-time SSE notifications so assignees see updates instantly, eliminating the need to refresh or poll for task changes

Stack: TypeScript, React, React Hook Form, React Query, Chakra UI

Projects

Meiro (github.com/elianiva/meiro) Oct 2026 — Present
- Built a native desktop YouTube Music client in Go with very low RAM use, with its own interface instead of a Chromium web front end
- Almost full parity with the YouTube Music app, including browsing, search, queue, lyrics, library, and system media controls

Stack: Go, Bazel

Foldcn (foldcn.elianiva.com) Jun 2026 — Present
- Built a shadcn-compatible registry for Foldkit, a non-React TEA framework, registered as a shadcn CLI namespace
- Shipped 74 components, blocks, and utilities on @foldkit/ui primitives, with a published parity audit against shadcn/ui

Stack: Foldkit, Effect, Tailwind, TypeScript

Lutra (lutra.elianiva.com) Jun 2026 — Present
- Built a WebGPU colour grading engine that compiles a 13-layer stack into one WGSL compute program, reading back only on export
- Forked LibRaw to wasm with Emscripten for RAW decoding, behind an Effect store that can swap IndexedDB for a server

Stack: Effect, Foldkit, WebGPU, TailwindCSS

RooCode (github.com/RooCodeInc/Roo-Code) May 2025 — Dec 2025
- Merged 13+ PRs to Roo Code, an open-source AI coding agent for VS Code, focused on UI polish and bug fixes
- Rebuilt context-mention UI with cleaner layout, fuzzy search, and keyboard navigation, and built the initial Marketplace UI

Stack: TypeScript, React, VSCode Extension API

Education

State Polytechnic of Malang Malang
Bachelor of Applied Science, Informatics Engineering *Aug 2022 — Aug 2026*
- Cumulative GPA: 3.86/4.0
